SUMMARY

I'm a self-motivated and diligent person with web development and cloud hosting experience. I've developed and hosted websites with HTML, CSS, JavaScript, and software such as AWS (EC2, S3, Route 53). I'm familiar with Linux operating systems, version control with Git, and developing basic scripts to automate processes. I like debugging problems, acquiring new technologies, and building websites that are both efficient and accessible. I'm searching for projects where I can develop my skills and work on actual projects within a team-based setup.

PROJECT

AWS EC2 Static Website Hosting

github.com/janakgithubrit/aws-ec2-static-website

- Hosted a static website on AWS EC2 instance using NGINX.
- Automated deployment using Bash scripting.
- Demonstrated cloud deployment, Linux setup, and infrastructure basics.

AWS S3 + Route 53 Portfolio Hosting

github.com/janakgithubrit/portfolio

- Hosted a custom domain portfolio website using AWS S3 and Route 53.
- Integrated GitHub for version control and site backup.
- Configured static website hosting with public access and custom DNS routing.

PRODUCT CARE CENTER

github.com/janakgithubrit/After-sales-service-system • August 2022 – April 2024

- Product Care Center covers various processes designed to ensure customers are happy with their bought electronic products and services.
 - These services offer ways to handle customer questions, give product assistance, provide in-depth details about products, assist in setting up, manage complaints, and gather customer opinions.
 - Introduced a comprehensive system in the Product Care Center, enhancing customer engagement by offering seamless support channels, detailed product guides, and efficient complaint resolution mechanisms.
